

SCADA Network Specialist

Quality minded and experienced SCADA Network Specialist, Silkeborg

ABOUT SCADA INTERNATIONAL

SCADA is an international and successful Danish company with subsidiaries in Germany, Poland, Spain, US and Ukraine. We are a dynamic company with a vast amount of experience within SCADA systems, SCADA application solutions, Park Network Solutions and Energy Power Control.

We are 80 dedicated and motivated employees, and we are looking for a skilled and experienced colleague for our headquarter in Silkeborg, who will help us ensure that we continue to provide world class service for our global customers.

Our vision is to be the most trusted global partner within SCADA technical support and solutions for the renewable energy industry.

For more information about SCADA International, please visit: www.scada-international.com.

POSITION

You will primarily be working as consultant on new network technologies, design and documentation with our customers and will therefore experience changing workplaces. A consultancy period with one of our customers can last from 3 – 12 months.

We know that SCADA Network Specialist is a very important position, and you are therefore going to have great influence on the content and the structure concerning the network support as well as the opportunity to create the best possible basis for world-class network support for our customers.

You will be expected to be able to solve complex technical issues working with specific customer defined projects. Furthermore, you will be working within a highly technical environment where you will be giving the opportunity to strengthen and develop your network competences.

You will be part of our highly skilled and dynamic network support team. You will collaborate closely with your colleagues in Technical Support, project department and have contact with our engineers and technicians working on site for our customers.

It is crucial that you are able to stay organized and maintain a high support level throughout a working day. Robustness, flexibility and the capability to stay unshaken by events when your competences are requested by many stakeholders, are the main personal competences we are looking for.

MAIN RESPONSIBILITIES

You will be a part of the implementation phase and responsible for maintaining and developing the infrastructure and production environments within our customers' SCADA systems. Your primary tasks will be configuration and support. You will also be working with design, installation of hardware and software, documentation and network related assignments.

Furthermore, you will play a very important part in teaching you colleagues network systems as well as being in contact with customers by phone and email.

CANDIDATE BACKGROUND

Your educational background is not crucial to us. However, we expect that you:

- Have +4 years of practical work experience on a daily basis with network infrastructure.
- Have thorough knowledge and experience with Cisco on a CCNA level as a minimum.
- Have worked with routers, switches, firewalls, VPN (VPN (IPSEC L2L, Open VPN, Easy VPN), UTMS, IOS configuration.
- Have extensive knowledge of Cisco device configuration through CLI.

If you have experience with fiber network and basis knowledge of SCADA systems, protocols and Cyber Security (NERC CIP), it is definitely a plus.

Network is a highly evolving area at SCADA International, and we expect you to have several years of experience within the area and that you thrive with the role as a "go-to-person" on all levels of network related areas.

We are experiencing an increasing degree of complexity in our assignments, and this is the reason for searching a colleague who is a specialist within the network area. If you want to challenge yourself with new assignments, develop your knowledge of new technical solutions that can support the development of our SCADA systems and create value for our customers, this is the job for you.

You have excellent oral and written communication skills in English, and the position requires up to 50 travel days per year, depending on customers' locations.

WHAT WE OFFER

You will be offered a high degree of freedom and will be given the opportunity to play a vital role in development of SCADA International. Besides a competitive benefit package, we offer an entrepreneurial and friendly environment. You will of course be enrolled into our onboarding program and receive a thorough introduction to all functions.

HOW TO APPLY?

To apply, please send your CV and application to job@scada-international.com and label it "SCADA Network Specialist". If you have questions before you apply, please do not hesitate to contact HR Director, Pernille Jørgensen, +45 2135 1435.

We urge you to send your application today as we will invite for job interviews on a running basis.

WE LOOK FORWARD TO HEARING FROM YOU!
