SOFTWARE SOLUTIONS

Choose 1st and 2nd levels SCADA pioneer

With more than more than 10 years of renewable energy expertise SCADA International has grown to be a leading software solution provider within the industry.

OneView® 1st and 2nd level SCADA as well as Data Gateway solutions provide you with normalized and streamlined data as well as full ownership of it.

Data Gateway says no to limited data access

The OneView® Data Gateway combines the ability to collect, interpret, normalize and deliver data coming from multiple site servers (level 1 SCADA systems) or directly from turbine controllers of different manufacturers' brands.

OneView® Data Gateway is a solution for those who have an older assets without a SCADA system or the owner has assets with interface difficulties due to old communication drivers, poor data connection or obsolete hardware.

Monitor on site with independent 1st level SCADA

When acting as a 1st level SCADA system, the OneView® SCADA connects directly to the e.g. turbine controller/PLC or solar collector inverter, collects the data and controls the asset. In addition, it provides full and unlimited control to the turbine data and allows the data to be calculated and displayed according to customer requirements.

This solution replaces each specific SCADA system with a unified solution on site. Thus each specific park has the same SCADA solution.

SOFTWARE
SOLUTIONS

FEATURE	DATA GATEWAY	1st LEVEL SCADA	2ndLEVEL SCADA
MONITOR	NO	YES	YES
REPORT	NO	YES	YES
ANALYZE	NO	YES	YES
CUSTOMIZE	NO	YES	YES
BROWSER	NO	YES	YES
CONFIGURATION	NO	NO	YES
NORMALIZE DATA	YES	YES	YES
MULTIPLE INTERFACES	YES	YES	YES

Manage multiple assets in Oneview® with 2nd level SCADA

A diverse portfolio (different OEM's WTG) at the owners' sites means more than one 1st level SCADA system. Several systems lead to more manual work, less comparable information and more difficult asset management.

OneView® 2nd level SCADA combines each specific sites 1st level SCADA system and transforms them in a unified system that can be overlooked from the user headquarters.

“With the OneView® SCADA you get much more than a standard scada system.”

We share your passion for green energy

Since its foundation in 2006, SCADA International has grown to be a leading solution provider within the global renewable energy industry. With an extensive track record and deep roots in the Danish wind heritage our services span the entire value chain including SCADA Hardware Solutions, Software Solutions, Installation & Commissioning, Consulting and Value Adding Services.

Headquartered in Denmark, SCADA International employs close to 100 wind and SCADA specialists at offices in Germany, Poland, Ukraine, United Kingdom and USA. The company is certified according to ISO 9001, ISO 14001 and OHSAS 18001.

Why our customers choose SCADA International

An increasing number of companies in the renewable sector in Europe and North America choose SCADA International as their partner when it comes to SCADA systems and SCADA installation, surveillance, support and maintenance.

When choosing SCADA International you get solutions that are:

- Made for renewables
- Customized
- Scalable
- Open
- Reliable
- And support your business model
