

SCADA Engineer/SCADA Specialist

Would you like to be part of a growing, entrepreneurial business within Renewables?

WHAT WE ARE LOOKING FOR

We are looking for a skilled and experienced colleague for our US office in Portland, OR, who will join our mission to ensure that we continue to provide superior value and innovative solutions to meet our customers' needs and expectations throughout. Our new SCADA Engineer/SCADA Specialist will play a key role in facilitating cross company cooperation, utilizing the expertise of colleagues from our office in Denmark to provide the best solutions and standards of service to the US markets.

In this position you get the opportunity of experiencing two roles, working both in Engineering & Design as a SCADA Engineer, collaborating with Sales in designing software and hardware solutions for our customers, and as a SCADA Specialist in our Service department, you will be responsible for supporting our customers in solving advanced SCADA issues, ensuring that our customers always experience high system reliability.

You will support our business strategy by:

- Possessing technical understanding of wind turbines and expertise within SCADA systems.
- Having proven technical project management skills.
- Working in a structured, detail-oriented manner.
- Applying excellent problem solving skills.
- Being service-minded and great at interacting with customers.
- Demonstrating strong communication skills and fluency in English (and Spanish is a plus).

Your main responsibilities as our SCADA Engineer/SCADA Specialist will be:

- Design and cost calculation of software solutions.
- Sales support, technical tender material and bid management.
- Upgrades of software and hardware.
- 2nd level support on our own products and 3rd party software.
- Remote and on-site service support, and 24/7 service support worldwide.

YOUR BACKGROUND

We expect that you have extensive experience from the renewable energy industry or automation. Your educational background is preferably a degree as Bachelor of Science in Engineering, Computer Science or a related field, or the equivalent experience hereto, and we expect that you have 5+ years of direct work experience with SCADA systems. The ideal candidate for this position is familiar with OEM wind turbine SCADA systems and SCADA network security, and has knowledge of communication protocols including:

- OPCDA/UA/XML, Modbus, DNP3, IEC 61850-IEC104, SNMP
- PLC programming
- HTML 5
- NERC CIP/CSC20 cybersecurity principles
- Databases (MySQL, Microsoft SQL, MySQL control center)
- Wireshark
- MS Server 20xx

At a personal level, you enjoy working in an informal culture where social ability to connect with colleagues and clients is essential, and where proactivity and self-motivation are important ingredients for success. You take pride in the quality of your work and deliveries, and you are used to working within tight deadlines.

WHAT WE OFFER

As our new SCADA Engineer/SCADA Specialist, you will be given a lot of responsibility and opportunities for growth. This job offers a variety of different tasks and is great for someone who is motivated by work that brings new technical challenges, and for someone who thrives in a dynamic and fast paced organization, where adaptability and collaboration is key. You will be offered a high degree of freedom and will be given the opportunity to play a vital role in developing SCADA International. Besides a competitive benefit package, we offer an entrepreneurial and friendly environment with innovative and bright colleagues. You will of course be enrolled into our onboarding program and receive a thorough introduction to all functions.

ABOUT SCADA INTERNATIONAL

SCADA is an international and successful Danish company with subsidiaries in Germany, Poland, Spain, US, Ukraine, and Russia. We are a dynamic company with a vast amount of experience within SCADA systems, SCADA application solutions, Park Network Solutions, and Energy Power Control.

SCADA International is passionate about making a difference and strives towards continued growth for both our customers and employees. Our vision is to be the most trusted global partner within SCADA technical support and solutions for the renewable energy industry.
