

Server Specialist

Would you like to be part of a growing, entrepreneurial business within Renewables?

WE ARE LOOKING FOR 2 NEW SERVER SPECIALISTS

We are looking for two skilled and experienced colleagues, who will join our mission to ensure we continue to provide superior value and innovative solutions to meet our customers' needs and expectations throughout. Our new Server Specialists will play key roles as consultants to one of our biggest clients located in the central region, Denmark, ensuring great customer satisfaction by providing proactive service.

You will support our business strategy by:

- Being highly motivated to learn more about technology and security.
- Having a structured and result oriented approach to your tasks.
- Working well both independently and as part of a team.
- Being service-minded and focused on the needs of our customers.
- Demonstrating good English skills both orally and in writing.

You will become part of a team where things are happening fast, and it is important you are motivated by and able to handle several tasks and projects simultaneously without losing focus. As one of our new Server Specialists, your main areas of responsibility will be:

- Ownership of the server hardware platform, which is used for the SCADA system.
- Optimization of servers/computers and other equipment such as storage and UPS.
- Optimization of security solutions on our customer's platforms.
- Automation of installation through PowerShell or Chef.
- Introducing new IT-technical solutions.
- Test, verification, documentation and release of hardware, firmware and software.
- Creating documentation, training material, procedures and processes.
- Providing 2/3 Level support for IT technicians located in Onshore, Offshore and Service.

YOUR BACKGROUND

We expect that you have experience from the renewables industry or automation. You have a technical background as a Data Technician or an education within Computer Science or Engineering, combined with 4-5 years of experience within IT or industrial IT. The ideal candidate for this position has in-depth knowledge of:

- virtualization (VM-Ware, Hyper-V)
- server hardware
- server operating systems (Microsoft, Linux)
- scripting (PowerShell, Bash)
- storage- and backup solutions
- database solutions (MS SQL, MySQL)
- UPS solutions and automating infrastructure (Ruby, Python)

Furthermore, we expect that IT security is a high priority for you, and that you have knowledge of different security products, e.g. antivirus, firewalling, and advanced endpoint protection.

At a personal level, you enjoy working in an informal culture where social ability to connect with colleagues and clients is essential, and where proactivity and self-motivation are important ingredients for success. You take pride in the quality of your work and deliveries, and you are used to working within tight deadlines.

WHAT WE OFFER

As one of our new Server Specialists, you will be given a lot of responsibility and opportunities for growth. This job offers a variety of different tasks and is great for someone who thrives in a dynamic organization, where adaptability and collaboration are key. You will be offered a high degree of freedom and will be given the opportunity to play a vital role in developing SCADA International. Besides a competitive benefit package, we offer an entrepreneurial and friendly environment with innovative and bright colleagues. You will of course be enrolled into our onboarding program and receive a thorough introduction to all functions.

ABOUT SCADA INTERNATIONAL

SCADA is an international and successful Danish company with subsidiaries in Germany, Poland, Spain, US, Ukraine, and Russia. We are a dynamic company with a vast amount of experience within SCADA systems, SCADA application solutions, Park Network Solutions, and Energy Power Control.

SCADA International is passionate about making a difference and strives towards continued growth for both our customers and employees. Our vision is to be the most trusted global partner within SCADA technical support and solutions for the renewable energy industry.
