

Project Manager

Would you like to be part of a growing, entrepreneurial business within Renewables?

WHAT WE ARE LOOKING FOR

We are looking for a skilled and experienced colleague for our PMO department in Silkeborg, who will join our mission to ensure that we continue to provide superior value and innovative solutions to meet our customers' needs and expectations throughout. Our new Project Manager will be referring to the Director of PMO and play a key role in planning and executing projects, motivating and leading team members, collaborating with colleagues across the organization and globally, and handling the direct contact to customers, ensuring a good flow of communication.

The person we are looking for, is someone who is motivated by getting their hands on many different types of tasks, has technical insights, and is excited by the idea of working on large and complex projects in an agile and growing organization. You will support our business strategy by:

- Applying excellent project management skills.
- Being pro-active, self-driven and a great problem solver.
- Working in a structured manner and having focus on the details.
- Having the ability to step up and see the big picture across projects.
- Seeking opportunities for additional project sales.
- Possessing strong presentation and communication skills and fluency in English and Danish.

Your main responsibilities as our Project Manager will be:

- Clarification of scope, budget, and project planning.
- Ensuring efficient utilization of resources.
- Delivering projects within time and budget.
- Handling of change order and ERP system.
- Developing a high-performance team.
- Continuously optimizing projects based on lessons learned.
- Collaborate across departments and give support and feedback to Sales, E&D and R&D.

YOUR BACKGROUND

We imagine that you are a great multitasker and problem solver. Most importantly, you have some years of solid experience with managing projects independently, approach problems and solutions with a holistic mindset, and have an excellent understanding of customers' interests and needs. We prefer a candidate who has a technical background and is familiar with the renewable industry, however, it is not a requirement that you have prior knowledge of SCADA systems. Furthermore, it is considered an advantage if you have commercial experience, are familiar with Navision, and are confident communicating in German and Spanish in addition to fluency in Danish and English. Moreover, you are willing to travel 15-40 days/year as part of the job.

At a personal level, you enjoy working in an informal culture where social ability to connect with colleagues and clients is essential, and where proactivity and self-motivation are important ingredients for success. You take pride in the quality of your work and deliveries, and you are used to working within tight deadlines.

WHAT WE OFFER

As our new Project Manager, you will be given a lot of responsibility and opportunities for growth. This job offers a variety of different tasks and is great for someone who thrives in a dynamic organization, where adaptability and collaboration are key.

You will be offered a high degree of freedom and will be given the opportunity to play a vital role in developing SCADA International. Besides a competitive benefit package, we offer an entrepreneurial and friendly environment with innovative and bright colleagues. You will of course be enrolled into our onboarding program and receive a thorough introduction to all functions.

ABOUT SCADA INTERNATIONAL

SCADA is an international and successful Danish company with subsidiaries in Germany, Poland, Spain, US, Ukraine, and Russia. We are a dynamic company with a vast amount of experience within SCADA systems, SCADA application solutions, Park Network Solutions, and Energy Power Control.

SCADA International is passionate about making a difference and strives towards continued growth for both our customers and employees. Our vision is to be the most trusted global partner within SCADA technical support and solutions for the renewable energy industry.
