# Fiber Technician, Contract

*Would you like to be part of a growing, entrepreneurial business within Renewables?*

## **WHAT WE ARE LOOKING FOR**

We are looking for a skilled and experienced colleague to join our US department on a contract-based employment until the end of 2019. Our Fiber Technicians support our business by making sure that all work is carried out in accordance with the project plan, deadlines, and customer requirements in close corporation with our Project Managers. At SCADA International, we take great pride in the quality of our work, and we are looking for someone who can work with our team of dedicated people to ensure that we continue to provide superior value to our customers.

As a Fiber Technician at SCADA International you will have the overall responsibility for splicing, termination and testing of fiber optic cabling in wind turbines working on site across the United States (primarily in the Midwest). You will also support the installation and connection of servers associated with the turbine applications and be responsible for all fiber related work on site.

To meet our expectations for a Fiber Technician, we expect that you:

- Have a strong quality focus and a high attention to detail and accuracy.
- Are proactive and self-motivated in your approach to the work.
- Collaborate well with your team.
- Posses the flexibility to adapt as plans may change due to reasons beyond your control.
- Are motivated and able to travel for extended periods of time.

## **YOUR BACKGROUND**

To be an excellent Fiber Technician you need a strong motivation to be the best at what you do and take pride in your craftsmanship. You thrive in an environment where two days are never the same and you like traveling on the job. You are able to work independently and rely upon experience and good judgment to plan and accomplish daily and weekly milestones.

We imagine the ideal candidate for this position has at least 2 years of splicing experience and is able to perform the installation, splicing, fusion, termination, testing/troubleshooting and OTDR testing and troubleshooting of fiber optic cabling systems. It is expected that you have a High School degree, communicate fluently in English, and are used to working within tight deadlines. If you have a Technical Certificate or an OSHA 10 Certification it is considered an extra plus.

This position requires the ability to spend significant time working while standing, kneeling and walking on uneven ground, as well as possible climbing of ladders or being in high places greater than 15 feet, working in tight spaces, and lifting 50+ lbs., and candidates cannot be colorblind. Candidates should only apply if they are capable of working in these conditions.

## WHAT WE OFFER

As one of our Fiber Technicians, you will be given a lot of responsibility in ensuring we continue to meet our high standards of quality, and you will have the opportunity to play a vital role in the development of SCADA International across the US.

This job is great for someone who thrives in a dynamic organization, where adaptability and collaboration are key, and the road from thought to action is short. Most importantly, we offer an entrepreneurial and friendly environment with innovative and bright colleagues.

## HOW TO APPLY?

Are you the right person for this job, we would love to hear from you. We are looking for someone to start as soon as possible, and we go through applications on an ongoing basis, so don't hesitate to get in touch.

If you have any questions regarding the position, you are welcome to contact our Senior Projects & Operations Manager, David Bradley, at +1 (503) 703-9102.

To apply, please send your CV and application via our [website](#).

## ABOUT SCADA INTERNATIONAL
